Personal statement

I'm a skilled Website Developer, with 3 consecutive years of experience. I do consider myself a very communicative, kind person with great capabilities to adapt and cooperate with all different kinds of people.

I've worked in a lot of commercial projects with quite diverse scopes, purposes and categories, having used both Front-end and Back-end tools, I've effectively worked as the Full-Stack Web Developer all along my employment history.

Currently, I'm looking for the job vacancy that would put my skills and experience to use and could provide opportunities for further professional and personal development.

Personal skills:

Magento 2, Shopify, WordPress platforms

Front-end tools: JavaScript, React, Redux. HTML, CSS, SASS, LESS.

Back-end tools: PHP (OOP, SOLID), Composer, NodeJS, Liquid.

Databases: MySQL, SQL, NoSQL.

API: SOAP and RESTful.

Linux OS proficient skills.

Advanced English knowledge, on par with native speakers.

Work experience

2019 January – 2020 February | Research Publishing International
Full-stack WordPress Developer. Custom WordPress technology stacks.

2020 February - 2022 March | Scandiweb
Full-stack E-commerce Developer. Shopify and Magento-2 technology stack.

Education

2021 Sept. - 2025 June | Latvian University, Bachelor of Computer Science and Programming.
